

7095/4RG PROOF Mercury Lite Cinque 7095/4RG Proof

Certified aluminium 5 levels self-loading stretcher with 4 swivel wheels

FEATURES

Mercury Cinque is derived from one of the most successful projects in the field of rescue, certainly the Me.Ber product most appreciated, the Mercury 4RG. Mercury Cinque Lite is intended to further extend the operational capabilities of the original model by introducing 5-level logic, five heights, as they are commonly called. Mercury Cinque Lite is much more than an evolution though! It is the only five-height with a folding front trolley (on the other hand, what do you need a stretcher to help you load a patient from his bed, if you can't get through the narrow spaces of a house?) also the only one that guarantees you the maximum capacity of 250 kg on all five levels. Furthermore it is even lighter than the stainless steel model.

FIVE LEVELS

LOAD LEVEL - Loading height

Loading on the vehicle, handling on the ground, final transfer to the emergency room or operating room, treatment or triage on the site.

HIGH LEVEL - High rescue

Suitable as a resting position. Ideal height for the placement of a spinalized patient.

INTERMEDIATE - High bed

Typical height of a hospital bed or height suitable for seating ambulatory patients. Ideal height to transfer the patient from stretcher to chair and vice versa.

LOW LEVEL - Bed or sofa

Typical height of a sofa or a bed. This height allows easy transfer of a collaborating patient and simplifies the transfer on the stretcher.

BASE LEVEL - Ground level rescue

At only 30cm from the ground, it allows all conventional operations with a maximum load of 250 kg.

Main features: - 250 kg Maximum load capacity on all heights

- Folding front trolley
- Ergonomics for back pain: the stretcher controls and general ergonomics are designed not to overload the rescuer, especially to relieve the load on the back.
- 200mm wheels to overcome any roughness. Greater comfort for the patient and great safety for rescuers who can move easily even in the presence of uneven ground and surfaces.
- 4 swivel wheels for safe manoeuvring at all times. Mercury Cinque has all four swivel wheels. A simple command allows the unlocking of the rotation of the front wheels for maximum manoeuvrability.
- Reflective decorations to improve the visibility of the stretcher in the roadside assistance context at night, reflective stickers were used in various points.

Compatible with fixing system art. 955 Proof.

Device certified according to the European harmonized safety standards UNI EN 1865 - UNI EN 1789.

MAIN FEATURES

10G Certification	
Material	Painted aluminium
